ahmedzarif

Education

2018 – 2022
Cairo, Egypt

EL-SHOROUK ACADEMY, BACHELOR OF COMPUTER SCIENCE
Graduation Project – Sign Language to Text Conversion: Developed a Python-based machine learning system to convert real-time hand gestures into textual output using webcam input. Applied frame-sequencing logic and predictive modeling to generate words and full sentences, with a smart suggestion system to optimize speed and accuracy.

Skills

Languages & Markup: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS / Sass
Frameworks & UI: Angular 2+ → 21 (Standalone, Signals, Zoneless, SSR), React, PrimeNG, TailwindCSS, Bootstrap
State & Data: NgRx SignalStore, RxJS, Redux, REST API Integration, HTTP Interceptors, Caching Strategies
Testing & Quality: Vitest, Jasmine / Karma, ESLint, Prettier, Husky, lint-staged, Sentry
Tools & Platforms: Git, GitHub, Git Flow & Code Review, Node.js, NPM, Firebase
Other Skills: Internationalization (i18n) & RTL, Responsive Design, Cross-Browser Compatibility, Web Performance Optimization, Agile / Scrum

Profile

Frontend Developer (Angular Specialist) with **2+ years of professional experience — plus a year as a frontend trainee** — building and scaling enterprise-grade applications across POS, e-commerce, and digital ordering. Deep expertise in **Angular 21** (standalone components, signals, zoneless change detection, SSR)**, NgRx SignalStore, RxJS**, and TypeScript, with a strong focus on modular architecture, REST API integration, and performance optimization. Key achievements:

- **40% faster checkout through multi-gateway payment integration in the Prism V2.5 POS platform.**
- **25% increase in user engagement on the BMask e-commerce platform via responsive UI/UX improvements.Shipped 4 production platforms — retail POS, QR ordering & loyalty, and two e-commerce storefronts — with SSR, Apple Pay, and multi-gateway checkout.**
- Enhanced digital presence for Retail-Tec by delivering a modern portfolio website, showcasing **20+ years of experience, 850+ implementations, 5000+ customers, and 7000+ completed projects**. Thrives in **Agile teams**, ensuring **clean code, scalable delivery, and seamless user experience** across complex projects.

Projects

Lead Frontend Developer

Point of Sale Management System,
Angular 21 (Zoneless) • NgRx SignalStore • RxJS • PrimeNG • TailwindCSS • Sentry

- Spearheaded end-to-end POS modules — **Touch POS, Transaction V2, Inventory, Invoicing, Customer Management, Accounting, Daily Shift, Transfers & Receiving** — serving large-scale retail operations.
- Built the tender & checkout engine: split payments, online payment support, item- and ticket-level discounts, coupons, void-item handling, and kit/package item selection.
- Implemented barcode-driven item lookup for fast cashier entry, plus offline-aware request handling and cached lookups for unstable in-store networks.
- Modernized legacy Angular components, improving scalability, maintainability, and readiness for long-term enterprise use.

Frontend Developer

BMask, Angular 18 • NgRx Signals • PrimeNG • Bootstrap 5 • ngx-translate

- Built and maintained the Angular frontend for a Saudi-based e-commerce platform specializing in mobile accessories.
- Implemented reusable Angular components and integrated APIs for product, cart, wishlist, checkout, **warranty activation (IMEI)**, and car-service booking flows.
- Integrated **Tamara, Tabby, and Apple Pay**, enabling seamless and secure payment experiences for customers.
- Improved engagement by **25%** across mobile and desktop through responsive design and optimized UX.

Frontend Developer

Meraki QR Menu — Digital Ordering & Loyalty Platform Frontend Developer,
Angular 21 SSR • Express • NgRx SignalStore • TailwindCSS 4 • Vitest

- Built a **server-side-rendered** QR ordering application for restaurants and coffee shops: menu browsing, product options, multi-select add-ons, cart, checkout, and order tracking.
- Implemented a **loyalty & rewards engine** — points accrual, free-cup redemption, and store-credit payment — alongside an unpaid-orders and resume-cart flow.
- Integrated **Apple Pay** and dynamic tipping into the checkout experience.
- Engineered bidirectional infinite category feeds with scroll sentinels, a global loading interceptor, and per-profile allergen filtering.
- Shipped full Arabic / English localization with RTL layouts; covered core logic with **Vitest** unit tests.

Frontend Developer

Samah Abaya — Fashion E-commerce Platform,
Angular 21 SSR • Express • NgRx SignalStore • PrimeNG • TailwindCSS 4 • Swiper

- Built a **server-side-rendered** storefront for a modest-fashion retailer — brand pages, category browsing with UDF-based attribute filtering, product details, wishlist, and search & filter.
- Implemented an Instagram-style **reels** experience — Cloudinary-hosted video slider with lazy loading — to drive product discovery from the homepage.
- Delivered the cart-to-checkout flow with a **partial-payment (deposit)** option validated against order balance and store minimums, and integrated the **MyFatoorah** payment gateway.
- Built SSR-safe HTTP interceptors (auth, language negotiation, offline detection) using platform checks, plus full Arabic / English localization with RTL layouts.

Frontend Developer

Retail Company Portfolio, Angular • Responsive Design • SEO • Accessibility

- Designed and developed the official corporate portfolio website for a leading retail technology company, delivering a modern, responsive, and accessible UI/UX with consistent performance across desktop and mobile.
- Showcased the company's track record — 20+ years of experience, 850+ implementations, 5000+ customers, 7000+ completed projects — supporting digital presence and client acquisition.

Professional Experience

12/2024 – present
Cairo, Egypt

Retail Technology Company, Frontend Developer (Angular)
Key Contributions:

- Primary frontend developer on **Prism V2.5**, a web-based POS platform for large-scale retail operations, owning **19 feature modules** end to end.
- Integrated **7+ payment gateways** (Tamara, Tabby, Mada, MyFatoorah, STC Pay, Al Rajhi, Bank Cards) together with an online-tender flow, reducing average checkout time by **40%**.
- Led the migration to **Angular 21** with zoneless change detection and standalone components, improving runtime responsiveness and reducing bundle size.
- Architected a reusable **NgRx SignalStore** layer with custom store features (withPagination, withRequestStatus, query caching, devtools), adopted product-wide to eliminate duplicated state logic.
- Built the HTTP interceptor chain — authentication, response caching, offline detection, and Sentry tracing — and integrated **Sentry** monitoring for production error triage.
- Delivered full **Arabic / English internationalization** with RTL support, plus a themable PrimeNG + TailwindCSS design system with dark mode.
- Established frontend quality gates with ESLint, Prettier, Husky, and lint-staged, raising code consistency across the development team.
- Diagnosed and resolved high-priority production bugs, sustaining **99.9% uptime**; delivered features in Agile sprints through a PR-based Git workflow with backend engineers and QA.
